

Fire Safety Alert

Did you know
embers from a
wildfire can
ignite a home
from a mile
away?

What can we do to protect our homes and our neighborhood?

- *Prune and remove tree branches to be high off the ground.
- *Clear brush and leaf piles, which can act as a nest for embers.
- *If wind blows leaves and debris to the same spot near your house, embers can be blown to that exact spot and ignite. Clear these spots regularly.
- *Keep grass short and rain gutters free from debris.

JUST DO IT!
